

300 L/h → 40 m³/day
Fresh water output

Fixed · Mobile · Barge
Set-up tailored to your site

Designed and built
in La Ciotat, France

Every site has its own constraints: flow rate, raw water quality, available power, space. We design and build desalination and washing installations tailored to your specifications, with the philosophy that has earned us the trust of sailors: **simple, robust, easy to maintain**.

A modular and scalable offer

Application
- Rinsing
- Washing
- Hull cleaning
- Any application needing reliable fresh water

Set-up
- Fixed
- Mobile
- Barge-mounted

Production
- Fresh water
- Sea water
- Mixed

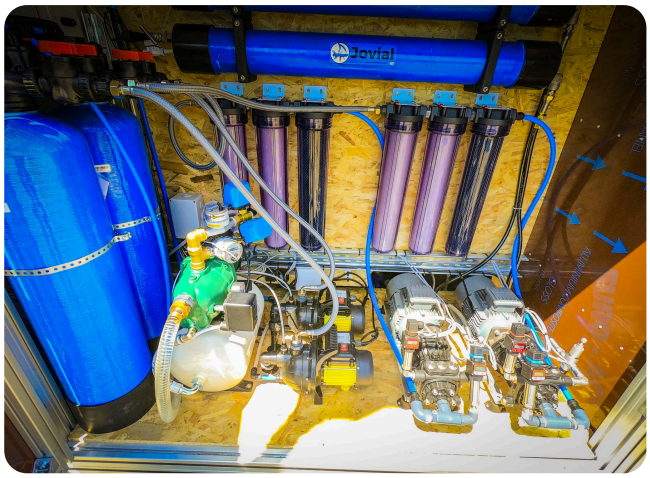

Energy
- Electric
- Solar
- Thermal

Who it is for

- Marinas and leisure ports
- Shipyards and hull-cleaning areas
- Hotels, campsites, villas and remote sites
- Local authorities

Our services

- **Desalination** from 300 L/h to 40 m³/day: fixed, mobile or on-board systems
- **High-pressure washing modules** using fresh or sea water, with detergent injection
- **Automated water management** and remote monitoring of installations
- **Maintenance** of water treatment installations
- **Engineering and project management**: we support professionals in their water conservation efforts

Treatment core of a 600 L/h station: pre-filtration, membranes, high-pressure pumps.

How we work

1. **Needs assessment**
   Use, flow rate, raw water, power, space
2. **Design and quotation**
   Costed solution, no commitment
3. **Manufacturing**
   Assembly and workshop testing in La Ciotat
4. **Commissioning**
   Installation and training of your staff
5. **Follow-up**
   Maintenance and remote monitoring

Project

Self-service desalination and washing station – Port Grimaud, France

Let's talk about your project

Every installation is assessed and priced on quotation. Tell us about your needs and we will get back to you quickly.
